

Directions for Roll and Read: You will need one dice and each player or each team will need a copy of the "Roll and Read" sheet. Sight words are used for this game. Your child will be bringing his or her index card box home at the end of the year with all of his or her mastered sight words that you can use for the game. If you would like to play before then, please notify your child's first grade teacher and she will be happy to send home a master word list that you can use.

Each player takes turns rolling the die. The number rolled (2 through 6) is the number of letters in a word that a player needs to record and to read. For example, if a player rolls a 3, then that player needs to find, read, and record a 3 letter word in the 3 column. If the number 1 is rolled, then that player loses a turn. If a player cannot read a word, then he or she loses a turn.
