

**To:** Parents  
**Date:** November 11, 2009  
**Subject:** H1N1 Vaccination Update

---

### **Update on H1N1 and Seasonal Flu Vaccinations**

- The Health Department is targeting "**high risk**", children ages 6 months to 24 years of age, pregnant women, people with weakened immune systems and certain chronic medical conditions, and health care workers.
- If your child missed the vaccination at school and you want them to receive the shot or flu mist for H1N1 or seasonal flu, please contact one of the two health departments listed below. At this time the health department is not able to determine when or if they will be able to return to the schools.
- The health department address, vaccination clinic hours and telephone numbers are below. The health department staff hopes to offer vaccines to the general public when additional vaccine arrives. They also hope to extend department clinic hours for vaccination as additional shipments come in.
- Parents, please call the health department clinic first to make sure they have enough vaccine and determine what kind they have either H1N1 and/or seasonal. The numbers are provided below.

**Vaccinations for H1N1 and Seasonal Flu Shots will be administered at the  
Local Health Department Clinics when available:**

**Monday – Friday from 8-11:30 and 1:00- 3:30 Parents, please contact:**
